

# Solution-IV® Reprographics

## Accounting and Business Management

**Solution-IV Reprographics™** is a completely integrated business management solution for the Reprographics industry. The General Accounting modules are GAAP compliant and satisfy the demands of corporate management and the finance department. The Operations modules manage Order Processing, POS, Job Tracking, and Inventory requirements. A full range of specialized Reprographics pricing and customer discount options are supported. Our Web-based Customer Service module enables customers to view their account status, invoices, existing orders, get quotes, place orders and order Service Calls.

### Your Choice of Platform

With the wide variety of hardware and operating system platforms available today, one must look at the complete picture before making a purchasing decision. From the accounting software perspective, however, the choice is easy. **Solution-IV Reprographics and ezREPRO** run on Windows, UNIX and Linux Operating Systems. You can confidently make your application decision without regard for hardware or software platform configurations. **Cloud Based** systems are also available.

### Integration With Windows-Based Productivity Tools

**Solution-IV Reprographics** Accounting can integrate your business data with Windows Productivity products such as spreadsheets, word processors and databases. You can create and display graphs and charts and insert data into documents using your favorite Windows-based software with our TS ODBC DataServer™ option.

### Interfaces:

- TS ODBC DataServer** - Data Acquisition
- TS ReportServer** - Reports to screen, printer or file
- e-Pay** - Internet Credit Card Payment
- Salesforce** - Worlds leading CRM
- OpCenter/JobCenter** - Order/Workorder
- Sepialine** - Cost Reduction
- Midnight Print Shop** - Color printing system

**e-Dash Analytics:** A dashboard display of all the key data in the system, available with a few mouse clicks through a browser interface.

## Solution-IV Reprographics and ezREPRO(\*) Accounting and Business Management Modules

<b>General Ledger</b>	Your transactions are brought together to give you a detailed picture of your financial condition. Up to 24 months may be open, and there is an actual to budget feature. General Ledger supports multi companies, warehouses and divisions.
<b>Accounts Payable</b>	Purchases and payments are organized into reports that illustrate where your money is going, who needs to be paid, and how much cash you need to make timely payments and to take advantage of discounts.
<b>Accounts Receivable *</b>	Your sales, profit information and cash receipts are organized into reports that show items selling, profitability, outstanding receipts and sales representatives' productivity.
<b>Order Processing Point-of-Sale *</b>	Fully integrates your invoicing, inventory, accounts receivable and sales analysis functions. It helps you track your open orders, generate job tickets, produce invoices, handle RMAs and process quotes. It also provides detailed sales analysis reports. POS will scan, print receipts, connect to Credit Card Processing
<b>Special Order Processing Pricing/Discount Options *</b>	Order Processing supports many different reprographics customer/item pricing options including the following: list price discount, mark up cost or percentage, discount percentage, actual price, grid, layer, discount on dollar amount ordered, quantity breaks, set quantity, copy quantity, square foot, square inch, tiered, sets, copies, contracts and contract projects and Hi-Lo. Pricing can be established by customer by item up to 10 levels including contract and project pricing.
<b>Inventory Control *</b>	Manage your inventory. Inventory Control helps you trace your inventory transactions and turnover. Inventory Control Supports Multi- warehouses and warehouse transfers.
<b>Purchase Orders</b>	Automatically creates and prints purchase orders and records item receipts with full integration to Inventory Control. Orders may be tracked by item or vendor. Purchase analysis reports are also provided.
<b>Payroll</b>	Calculates employee checks and provides the reports for federal and state agencies. Payroll handles multiple taxing jurisdictions as well as 401(k) plans. Payroll can be integrated into TimExpress.
<b>Fixed Assets</b>	Helps you manage your assets and calculate depreciation. You may have different depreciation calculations on an asset as required for your business and taxing jurisdictions.
<b>WebServices</b>	A customer-oriented, Web-based interface allows your customers to access their account information, review and print past invoices and statements, get quotes, place orders, track orders, and set-up Service Requests.
<b>Estimating/Work Order</b>	A simplified, prompting interface to create Estimates and automatically generate Quotes and Work Orders.
<b>Prospect Management</b>	Assists the sales staff in managing their prospect and customer database. It is integrated with Accounts Receivable, giving the sales representative the option to convert a prospect into a customer.
<b>FormsCreator</b>	e-Mail, Fax and print on plain paper invoices, statements, orders and POs. FormsCreator can pay for itself in a few months by reducing personnel and postage costs.
<b>Service Contract Management</b>	Service Contract module helps manage service contract customers and equipment information. Equipment details, service and maintenance billings and calls, dispatch and technician scheduling are supported.
<b>JobTraK/TimExpress</b>	Advanced work order tracking, costing, and employee time for each line item. This information can be connected to TimExpress and the Accounting and Payroll modules.
<b>Credit Card Processing</b>	An integrated Credit Card Processing option enables a seamless verification operation when taking Credit Cards for payment. Internet based, credit cards are swiped and verified in seconds.
<b>UPS /FedEx Shipping</b>	Shipment information can be downloaded to the UPS WorldShip system eliminating multiple entry.
<b>e-Service</b>	Used with WebServices and Service Contract modules creating a Web-based Service system for your customers to place service request, supplies orders etc. Requires WebServices and Service Contract.
<b>e-Dash Analytics</b>	Solution-IV Analytics provides a simple to use graphic interface that with single clicks allow you to view your customers, accounts, sales and product detail, top-10 customers and items and more!
<b>Consulting Services</b>	Custom Services available to tailor Solution-IV to the way you do business. Custom reports, disaster recovery, Software as a Service (SaaS) and more.
<b>Support and Maintenance Programs</b>	Solution-IV is backed by a comprehensive Service and Maintenance program. This program provides Product Support, Product Maintenance updates and feature enhancements to keep your Solution-IV system running in top shape.
