Product: Solution-IV® Estimating Test Site: SE Blueprint, Kevin Anderson

SE Blueprint was a test site for Thoroughbred® Solution-IV® Estimating. Kevin Anderson and his staff provided many suggestions to make this module a winner for any reprographics company.

Here is what Kevin said about Solution-IV Estimating:

"We utilize the Thoroughbred Solution-IV Estimating module to not only put project parameters into our thoroughbred software and inform our customers of the estimate, but as an easy to use order entry system. The pull down customer and item menu features allow our personnel to easily input items to create quotes and orders without having to have any advanced training. Then the estimate automatically turns into a quote or order and invoice without having to reenter the data again. The easy step by step data input allows accounting to add additional services that may not make it to the invoice originally including items like binding and fuel surcharges. The Estimating module has allowed us to recoup the costs of add on items that may be overlooked in a traditional invoicing platform."

See below the prompting and selection pull down interface. There is little chance for mistakes or omissions.
